FUND OBJECTIVE & STRATEGY

At MH Capital we identify and capitalize on unique investment opportunities. Through a disciplined approach we provide our investors access to listed companies not accessible through other investment products.

WHO SHOULD INVEST

This investment is well-suited for long-term investors seeking the potential for enhanced capital growth. Due to the note's differentiated and targeted strategy, it is best viewed as a complementary addition to an investor's existing portfolio. Investors should have the capacity to tolerate higher levels of capital volatility associated with this type of investment.

RISK INDICATOR: These investments typically exhibit more volatility given their higher exposure to equities, which may result in capital losses. Expected potential long-term returns could be higher than other risk profiles – conversely potential losses could also be higher.

REGIONAL ALLOCATION: As of 30 April 2026, the MH Capital Growth AMC is primarily invested in South Africa, with a small strategic allocation to the United States via Berkshire Hathaway. South Africa: 87% | United States: 13%
